

Product Analysis

3.00 % Sulfur
0.15 % Boron
1.00 % Manganese
1.00 % Iron
1.00 % Magnesium
1.00 % Zinc

A basic package to provide a balanced mineral nutrition program for sand based greens/tees

Features/Benefits

- Dual chelation processes for nutrient stability
- Boosts uptake for most major elements
- Balances nutrient ratios in leaves/roots for maximum health and stress resistance

Suggested Rates

Normal maintenance: 1 to 2 oz. per 1000 sq. ft. (tissue test to verify)

Corrective rate: 3 to 4 oz. per 1000 sq. ft.

Use 2-gallons/1000 sq.ft. as a carrier. Allow to dry (30 to 45 minutes) and water in. Always use best management practices.
